

Final Project Week 3 Rubric

I have carried over the persistent data and improve layout requirements over from last week for a slightly reduced weight.

Requirement	Weight	Points	Description
Improve Layout	3	0-3	<ul style="list-style-type: none">• 2 Layout has images for different weather conditions• 3 A nice custom design is used (not the default)
User Option Selection	5	0-2.5	<ul style="list-style-type: none">• 2 Enable user to set high/low temperatures, weather conditions (rain, snow, fog, etc.), and time for notification• 2.5 Enable different notification times for different days of the week
Location	3	0-3	<ul style="list-style-type: none">• 2 Fix bugs in location lookup (manual typing in of location as text by user)• 3 Add location detection
Persistent Data	4	0-2	<ul style="list-style-type: none">• 2 A reasonable amount of weather data is kept when app is closed normally and when it is open, but running in the background
Test Cases	5	0-2	<ul style="list-style-type: none">• 1 Some test cases have been implemented with decent coverage• 2 Test cases have high coverage
Manual Testing	5	0-1	<ul style="list-style-type: none">• 2 Manual test plan for the app
